TYPO3 Core - Bug #89120

Loggers miss the requestId

Description
Because requestId is now an (optional) constructor argument of LogManager, but LogManager is instantiated by the bootstrap first without this argument, the requestId remains empty. The LogManager is indirectly instantiated the first time when error handling is set up and a logger is injected into ErrorHandler

[BUGFIX] Ensure LogManager has requestId set

Since LogManager is first used when ErrorHandler is instantiated,
we need to provide a properly set up singleton before
setting up error handling.

Resolves: #89120
Releases: 9.5
