Description

If one adds a page with doktype "4:Shortcut" and uses the shortcut_mode "First subpage of selected/current page" (pagesInternalLink), there is a info message about to which subpage this shortcut links.

If there is no subpage or the subpage is hidden, the message is useless, because it says: *Page is a link to the following page: / (First subpage of selected/current page)*. Therefore some information about the missing or hidden subpage should be added there instead.

Associated revisions

Revision 10eb394b - 2019-09-25 11:32 - Oliver Bartsch

[TASK] Make infobox for shortcut pages more helpful

Add proper information for the user about the target page.

In case the target page doesn't exist or is not accessible in the frontend, the infobox in the page module now states this out.

Resolves: #89121

Releases: master, 9.5
