Page TSconfig [TSconfig]

```

```

- I find the header "**TypoScript Configuration**" misleading. I would rename it to "**Page TSconfig**".
- I would rename "Include Page TSconfig (from extensions)" to "Include **static** Page TSconfig (from extensions)".

Motivation

- This may seem nitpicky, but I think using consistent terminology in BE, documentation etc. and not mixing up TSconfig and TypoScript would already help a lot to clear things up
- TypoScript + TSconfig is already being confused
- This unifies the terminology ("static" templates for TSconfig and TypoScript) and makes it consistent with documentation:

Register static Page TSconfig files

in <https://docs.typo3.org/m/typo3/reference-tsconfig/master/en-us/UsingSetting/Index.html#register-static-page-tsconfig-files>
