

TYPO3 Core - Bug #89181

Behaviour of inserting content element "Insert Records [shortcut]" from other language changed

2019-09-16 17:22 - Sybille Peters

Description

Scenario

- textmedia record is created in default language (uid=1)
- on translated page ("free mode") a shortcut (uid=2) is inserted with language 1, which points to record of default language (uid=1)

```
default language | translation
----- | -----
textmedia (uid=1) | shortcut (uid=2)
```

Expected result

record should be displayed (once) in FE for page in default language and for page in translation.

Additional considerations

This used to work in TYPO3 8. No longer works in 9, meaning on the translated page, nothing is displayed.

Not sure if this is now a bug or if it is correct that the element is not displayed.

version

TYPO3 9.5.9
