TYPO3 Core - Bug #89419

EXT:backend depends on EXT:install for environment routes, but has no dependency

PHP Version:	7.2	**Is Regression:**	
Tags:		**Sprint Focus:**	

Description

EXT:install is defining route tools_toolsenvironment while this is used by EXT:backend. Still I can not see a requires to ext install from ext backend.

```
ag "tools_toolsenv"
typo3/sysext/backend/Resources/Private/Templates/ToolbarItems/SystemInformationDropDown.html
8:<p class="dropdown-text typo3-module-menu-item submodule mod-tools_toolsenvironment" data-module
name="tools_toolsenvironment">

typo3/sysext/backend/Classes/Backend/ToolbarItems/SystemInformationToolbarItem.php
173:            'environmentToolUrl' => (string)$uriBuilder->buildUriFromRoute('tools_toolsenviron
ment'),

typo3/sysext/install/ext_tables.php
51:        'name' => 'tools_toolsenvironment',
```

Possible solution:

> a.fernandez 1:12 PM
> I think this requires two steps:
> 1) generate and render the link only if the route exists (try/catch on RouteNotFoundException or alike)
> 2) add EXT:install as suggestion

Revision 9477f2e3 - 2019-11-09 16:19 - Daniel Siepmann

[BUGFIX] Make EXT:backend independent of EXT:install

EXT:backend generates a URL to EXT:install, but has no dependency. This
can lead to composer setups with EXT:backend but without EXT:install,
leading to an exception while generating route.

Therefore a suggest is added as a hint to install also EXT:install.
Existing code is wrapped with an try / catch in order to work under both
circumstances.

Resolves: #89419
Releases: master, 9.5
