#### Description

Following ViewHelpers are missing proper examples in the PHPDoc:

- AvatarViewHelper
- ThumbnailViewHelper

As these ViewHelpers are not `@internal` and could be used by custom extension for e.g. backend modules they should contain examples like the other ViewHelpers.

[TASK] Add examples to ext:backend ViewHelpers

Following ViewHelpers now also feature proper examples:

- AvatarViewHelper
- ThumbnailViewHelper

As the ViewHelpers are not declared as `@internal` custom extension can use them for e.g. backend modules. Therefore they now contain examples about the usage.
