#### Description

When unchecking all options in each folder and file permission settings, they fall back to a standard definition. Currently it is required to have at least one options checked in one of the to settings (see screenshot).

Since this is a setting that is usually defined by an imported user group, it should be possible to provide an initial settings that turns everything off.

#### History

##### #1 - 2019-12-18 10:02 - Riccardo De Contardi

- Related to Bug #70812: edit user or usergroup > cannot remove every permission on file/directories added

##### #2 - 2019-12-18 10:03 - Riccardo De Contardi

Is this one the same issue? [#70812](#)

##### #3 - 2019-12-18 10:04 - Robert Wildling

I would say yes according to the detailed description of that issue.

##### #4 - 2019-12-18 11:22 - Riccardo De Contardi

- Status changed from New to Closed

- Target version deleted (Candidate for patchlevel)

[Robert Lemke](#) Wildling - I close this issue as a duplicate of [#70812](#); please continue the discussion there. I added your issue as related to keep track of it

If you think that this is the wrong decision please reopen it or ping me. Thank you.

##### #5 - 2019-12-18 11:24 - Robert Wildling

Great! Totally fine with that!

Thanks for being such a Sherlock Holmes and uncovering duplicates!

Have a great holiday season!

##### #6 - 2019-12-18 11:26 - Riccardo De Contardi

Thank you, too kind - you too.
