Description

I get sometimes an error in searchcontroller in function linkPage.

first i get two warnings:
Core: Error handler (FE): PHP Warning: array_replace_recursive(): Argument #2 is not an array in
/sysext/indexed_search/Classes/Controller/SearchController.php line 1335
Core: Error handler (FE): PHP Warning: array_merge(): Argument #1 is not an array in
//sysext/indexed_search/Classes/Controller/SearchController.php line 1345

then an error:
Core: Exception handler (WEB): Uncaught TYPO3 Exception: Argument 3 passed to
TYPO3\CMS\IndexedSearch\Controller\SearchController::preparePageLink() must be of the type array, null given, called in
/sysext/indexed_search/Classes/Controller/SearchController.php on line 1352

In my project sometimes "null" is stored for "static_page_arguments" in the database. Most other records are stored with "". I think
this happens with option "Index Records immediately when saved?"

if ($row['static_page_arguments'] !== null --> is not working.
if ($row['static_page_arguments'] !== null && $row['static_page_arguments'] != 'null') { --> works for me

Revision 05bf35d7 - 2020-02-27 13:51 - Manuel Munz

[BUGFIX] Fix Exception caused by empty staticPageArguments

When 'Index Records immediately when saved?' is enabled in indexing
configurations for records, then on saving the record the
string 'null' is used for this indexingconfiguration and passed to
SearchController::preparePageLink(), which expects an array and
therefore throws an exception.

This commit fixes this by checking if
$this->conf['staticPageArguments'] is an array and only then json_decode
that, else it sets the value to null.
