Description

Open an page in TYPO3 Backend List and Page module throws a warning.

This didn't happen with TYPO3 10.2.2

typo3/sysext/backend/Classes/Utility/BackendUtility.php
Line 641

```
$statement = $queryBuilder->execute();
    $runtimeCache->set('getPageForRootlineStatement-' . $statementCacheIdent, $statement);
} else {
    $statement->bindValue(1, (int)$uid);
    $statement->execute(); // this will trigger the warning alter on in doctrine
}
$row = $statement->fetch();
$statement->closeCursor();
```

vendor/doctrine/dbal/lib/Doctrine/DBAL/Driver/Mysqli/MysqliStatement.php
Line 236

```
$values[$parameter] = $value;
}

if (!$this->_stmt->bind_param($types, ...$values)) { // this triggered is the warning
    throw new MysqliException($this->_stmt->error, $this->_stmt->sqlstate, $this->_stmt->errno);
}

$this->sendLongData($streams);
```

Frontend works fine. If wanted or needed i can give access to the Installation

It looks like the PHP's prepared statement is lost on the database-side for some reason. So PHP tries to re-use the prepared statement, but the database has no clue about it anymore. Could you please try, if you have the same issue, if you use the PDO driver instead?

#10 - 2020-02-25 23:44 - Edward A. Gabdullin

#11 - 2020-02-26 00:03 - Markus Klein

Could you please check your cache configuration for the cache "runtime"?
It MUST use 'backend' => \TYPO3\CMS\Core\Cache\Backend\TransientMemoryBackend::class or any backend extending TransientBackendInterface. Obviously it does not in your case.
Consequently it tries to serialize the statement, which fails in case of PDO. Maybe this is also the cause for the error with the mysqli driver.

#12 - 2020-02-26 01:22 - Edward A. Gabdullin

After changing the cache configuration, everything works with the driver "mysqli" and "pdo_mysql".
Thank you very much!

#13 - 2020-02-26 02:57 - Timo Poppinga

for me too, thx

#14 - 2020-02-26 08:15 - Georg Ringer

- Status changed from Needs Feedback to Closed

Thanks Markus for helping out, closing issue

#15 - 2020-02-27 22:13 - Timo Poppinga

i think it would be good to throw an error if any wrong cache has been chosen

#16 - 2020-04-27 13:08 - Markus Klein

- Related to Bug #91206: PDOException "You cannot serialize or unserialize PDOStatement instances" in PopulatePageSlugs wizard added
