

## TYPO3 Core - Bug #90605

### fluidbased PageLayoutView doesn't take `tables\_modify` into account

2020-03-01 11:39 - Oliver Bartsch

<b>Tags:</b>	
<b>Description</b>	
If a user has not set `tables_modify` for `tt_content` he still gets all the action buttons and translate options displayed. Clicking on one of this buttons leads to infinity load of the frame.	
Some checks are needed to prevent this behaviour.	
Steps to reproduce	
<ul style="list-style-type: none"><li>• Create a backend user and a backend user group.</li><li>• Allow the user group to modify pages and also allow listing but not modifying of tt_content</li><li>• Open the page module =&gt; All options like hide, delete, edit and translate are still shown</li></ul>

[BUGFIX] Align new page module behavior with PageLayoutView

This fixes some missing or faulty checks related to the display and behaviour of the fluid based page module to bring it into alignment with the old PageLayoutView.

- Correctly consider localization TSConfig settings
- Add checks for content-editing allowed for user
- Add check for presence of untranslated records
- Pass all variables to record header/footer partial
- Do not link preview content if user has no content edit access
