Description			
Hi!			
When using the redirects module and setting a target via linkbrowser, there are only options to link to "Page", "File" or "External URL".			
The config of linking to records (i.e. news, config.recordLinks.tx_news....) is ignored / not shown.			
Should be possible too!			
Thanks!			
Best			
Christoph

this has been fixed with [#87574](#). important is that the tsconfig is added via ext_localconf, e.g. with

```
\TYPO3\CMS\Core\Utility\ExtensionManagementUtility::addPageTSConfig(  
'<INCLUDE_TYPOSCRIPT: source="FILE: EXT:theme/Configuration/TsConfig/Page/Specific/Linkhandler.tsconfig.typoscript">'  
);
```

Hi Georg,

works perfect, thanks!

Best,
Christoph

[...]

This kind of "workaround" can not be used when having a multitree website. Is it possible to have such a working scenario?
