Revision 2cad696a - 2020-03-27 15:44 - Benni Mack

[TASK] Clean up drawing configuration for Fluid-based page module

PageLayoutView now builds a "Configuration" model for both variants
PageLayoutView is not set up via the DrawingConfiguration object,
which is now based on a factory method.

PageLayoutController now injects all RequireJS modules in one place,
and not in fluid anymore.

Minor bugs regarding "getLanguageColumns" are fixed.

The main "pageLayoutConfiguration" is now injected and used where it does not
differ from the backend module configuration.

Resolves: #90858

Revision 9ee8d7a8 - 2020-03-29 09:14 - Christian Eßl

[BUGFIX] Fix visibility of translate button in old PageLayoutView

The old, non-fluidbased PageLayoutView was missing the translate button
for editors, even when they had the right permissions to edit content,
because the property \$pageinfo wasn't initialized early enough before
the permission check.
