[TASK] Remove dependency to algo26-matthias/idna-convert

The third-party library algo26-matthias/idna-convert is not compatible with PHP 7.4 (used for providing IDNA conversions for umlaut domains).

The classes from v1 are copied in order to have them still available, but we maintain the code ourselves and reduce the usage to a minimum.

```
composer remove "algo26-matthias/idna-convert:"
```

See <https://idnaconv.net/docs.html> for detailed upgrade changes.
