[BUGFIX] Use single type @var in LogEntry model properties

With <https://review.typo3.org/c/Packages/TYPO3.CMS/+64018> several @var annotations have been adjusted to reflect the actual used type of properties.

This however led to the issue that several properties of Extbase models had one type as annotation but used more than one specific type internally. Adding the additional type made phpstan happy but broke the property mapper of Extbase, which expects just one type to be annotated via @var.

Therefore, the @var annotations in the affected models have been reverted to their original state and the reoccurring errors have been put onto phpstans list of ignored errors.

Resolves: #90969

- Status changed from New to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server.

It is available at <https://review.typo3.org/c/Packages/TYPO3.CMS/+64094>

#2 - 2020-04-07 12:30 - Daniel Siepmann

- Status changed from Under Review to New

The real solution would be proper support by Extbase. But for now it might be enough to revert the changes of phpstan.
