<b>Description</b>			
Using georgringer/news with commit 205cb3e "Check TCA" results in:			
<pre>#1203699034 TYPO3\CMS\Core\Cache\Exception\NoSuchCacheException A cache with identifier "news" does not exist</pre>			
The reason is that the cache is not available because the container has not been loaded which would add the cache per service configuration.

[BUGFIX] Provide symfony container in install tool "Check TCA" action

A booted symfony container is needed as ext\_localconf.php is loaded since #89713 for the "Check TCA" action. ext\_localconf.php files may depend on a fully-booted symfony container, therefore we need to provide it in this case as well – or ext\_localconf.php loading may fail.

Adapt the LateBootService to allow to reset to a previously backed up container (even if it has been reset in the meantime by another method).

Currently affected extensions were EXT:news before commit ac0cb20c (which added a workaround for this case). Thus the bugfix can be verified against the parent of that commit: georgringer/news:205cb3e
