Tags:	TYPO3-9.1.15 Simulate Time		
Description			
<p>The Admin-Panel function Simulate FE-Time is not working at all in TYPO3 version 9.1.15! Submitting the Admin-Panel form with changed "simulate date/time" will change the given date/time after submitting. The frontend doesn't actually seem to get the desired time, so records with start/stop time do not behave as expected!</p> <p>After a long journey to find any configuration error in TYPO3 or PHP-Environment a downgrade to TYPO3 v9.1.14 worked to fix the issue. This indeed implies there must be any bug in TYPO3 Admin-Panel for v9.1.15 core.</p>

Revision 03c0c741 - 2022-01-04 14:22 - Susanne Moog

[BUGFIX] Do not overwrite previously set preview mode

The frontend preview aspect may be set from the admin panel or the frontend extension or even from a third-party extension in a middleware. The previous implementation overwrote the preview settings on every initialisation, resulting in lost preview information. Instead of overwriting the setting, this change takes the current preview value into account - if the preview was enabled by a previous instance this is kept.

Additionally, the logic to set the preview flag in both frontend and admin panel has been streamlined.

Resolves: #91225

Releases: main, 11.5

History

#1 - 2020-05-14 08:48 - Thomas Hempel

I confirm, that this is still (or again) an issue in version 9.5.17

#2 - 2020-05-20 15:37 - Björn Prothmann

Same in 9.5.18

#3 - 2020-06-04 15:04 - DANIEL Rémy

I found that the PreviewSimulator middleware clear the DateTimeContext set by the admin panel's PreviewModule middleware.

Disabling the PreviewSimulator middleware fix the issue for my use case.

- Related to Bug #91083: Preview setting "showHiddenRecords" in the admin panel does not work. added

#5 - 2020-06-25 16:51 - Sascha Löffler

I can confirm it for TYPO3 v9.5.19.

This patch solves the display of the timed content elements
<https://review.typo3.org/c/Packages/TYPO3.CMS/+64491>

but it does still not show the "Preview" box on the site (which i suspect is the expected behavior if i look at the code.)

So i had not only to delete the `GLOBALS['TSFE']->clear_preview();` call, but also add

```
if ($queryTime === false && GLOBALS['SIM_ACCESS_TIME'] !== GLOBALS['ACCESS_TIME']) {  
    $queryTime = GLOBALS['SIM_ACCESS_TIME'];  
}
```

to the `simulateDate` method because ADMCMD_simTime is not filled when setting the simulation time using the admin panel.
