

## TYPO3 Core - Bug #91312

### CSS/JS added via AssetCollector does not respect compression and concatenation

2020-05-05 21:08 - Josef Glatz

#### Description

### Problem/Description

Seems like the known compression and concatenation settings in TypoScript aren't taken into account in the compress and concatenation handler. There is an info in the rST <https://docs.typo3.org/c/typo3/cms-core/master/en-us/Changelog/10.3/Feature-90522-IntroduceAssetCollector.html#considerations> but there is no official statement about the "why". Some guys already asked for this particular stuff when talking about the nice new assetcollector.

### ToDo(s)

I can imagine something like

- adding a clear information about why this is not (and will be not) implemented (in the future)
- or add support jsConcatenateHandler cssConcatenateHandler jsCompressHandler cssCompressHandler
  - maybe it makes sense to add a feature toggle for it if there are any valid reasons for not adding them globally to the handlers

#### History

##### #1 - 2021-02-01 14:10 - Patrick no-lastname-given

I can confirm this. Assets from f:asset.css and f:asset.script ViewHelper are not compressed.

Any news here? Thanks
