#### Description

As an editor, I want to be able, to edit / view two or more forms parallel.

Often like to copy settings from one form to another. This is not possible at the moment.

This ends in an error:

```
Oops, an error occurred!
```

```
Exception while property mapping at property path "": Unauthorized modification of "prototype name" or "identifier".
```

```
More information regarding this error might be available online.
```

Applies to TYPO3 9 and 10.

#### AC:

- Editor is able to view / edit more than one form
