Description			
<p>https://docs.typo3.org/m/typo3/reference-coreapi/master/en-us/ApiOverview/Internationalization/ManagingTranslations.html#custom-languages mentions how to use custom languages.</p> <p>Here i define that de_AT should fallback to de, if no label is available in de_AT:</p> <pre>\$GLOBALS['TYPO3_CONF_VARS']['SYS']['localization']['locales']['dependencies']['de_AT'] = ['de'];</pre> <p>This works pretty well for language files, but the functionality is still missing in stdwrap_lang. Given i visit the page in de_AT with</p> <pre>page.30 = TEXT page.30.value = EN page.30.lang.de = DE #page.30.lang.de_AT = DE AT</pre> <p>I expect to see DE, but i see EN.</p>

#1 - 2020-06-28 19:52 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server. It is available at <https://review.typo3.org/c/Packages/TYPO3.CMS/+/64945>

#2 - 2020-06-28 20:06 - Christoph Lehmann

Furthermore i ask me, if

```
$GLOBALS['TYPO3_CONF_VARS']['SYS']['localization']['locales']['dependencies']
```

is somehow doubled with 'fallbacks' in site language configuration

```
languages:
```

```
-
  title: de_AT
  enabled: true
  base: /at/
  typo3Language: de_AT
  locale: de_AT.UTF-8
  iso-639-1: de
  websiteTitle: ''
  navigationTitle: AT
  hreflang: de-AT
  direction: ''
  fallbackType: fallback
  fallbacks: '3'
  flag: de
```

languageId: '2'
