

## TYPO3 Core - Bug #91746

### LinkService can't handle filelinks with additional arguments

2020-07-06 10:53 - Nigg no-lastname-given

<b>Status:</b>	Rejected	<b>Start date:</b>	2020-07-06
<b>Priority:</b>	Should have	<b>Due date:</b>

<b>Target version:</b>		<b>Complexity:</b>	
<b>TYPO3 Version:</b>	9	<b>Is Regression:</b>	
<b>PHP Version:</b>		<b>Sprint Focus:</b>	
<b>Tags:</b>			

#### Description

TCA:

```
'link' => [
    'label' => 'Link',
    'config' => [
        'type' => 'input',
        'softref' => 'typolink',
        'size' => 50,
        'renderType' => 'inputLink',
        'max' => 1024,
        'eval' => 'trim,required'
    ],
],
```

In my Model i will get more information with the Linkservice.

```
public function getLinktype(): array
{
    $linkService = GeneralUtility::makeInstance(LinkService::class);
    return $linkService->resolve($this->link);
}
```

Fluid:

```
<f:debug>{linkItem.linktype}</f:debug>
```

Linkvalue to a file with additional attribut target:

```
t3://file?uid=39973 _blank
```

TYPO3 will call an exception. Without additional arguments it will work.  
The problem only affects t3://file with additional arguments

#### History

#1 - 2020-09-22 19:38 - Georg Ringer

- Status changed from New to Rejected

This works without a problem with core's template, e.g. fluid\_styled\_content and a link for a header.

I suggest using <f:link.typolink parameter="{model.link}">link</f:link.typolink> which will generate a proper a-tag
