[TASK] Allow typo3/cms to be installed with Composer 2

Currently the dev dependency ocradius/package-versions does not work with Composer 2. To overcome this, Composer published an API compatible package which can be used as replacement.

This does not affect any published package. It is only a preparation to be able to switch to Composer 2 for testing and packaging.

```
composer req --dev composer/package-versions-deprecated --no-update
composer up typo3/cms-composer-installers composer/package-versions-deprecated ocradius/package-versions
```
