#### Description

In 10 LTS, redirects are automatically created when a slug changes.  
This is problematic and sometimes not wanted.

Example: if a site is still in development and a lot of initial content is created, every "copy page and update slug" would create a redirect entry.

Current solution is to simply disable the redirect extension...

There needs to be an option to disable this behaviour, ideally in the site configuration or at least globally.

There are also other problems with the current implementation, see [#91792](#) and [#91751](#)

The documentation of how to disable the automatic creation of redirects is hidden in the changelog

<https://docs.typo3.org/c/typo3/cms-core/master/en-us/Changelog/10.1/Feature-89115-Auto-createRedirectsOnSlugChanges.html>

This needs to be included in the redirects extension to show up at <https://docs.typo3.org/Home/SystemExtensions.html>

#### History

##### #1 - 2020-08-05 16:48 - Andreas Kiessling

- Related to Bug #91751: Redirects are not tied to site configuration breaking referential integrity and making it impossible to test on/transfer from staging systems added

##### #2 - 2020-08-05 16:48 - Andreas Kiessling

- Related to Bug #91792: Automatically created redirects are not created using the DataHandler added

##### #3 - 2020-08-05 16:49 - Andreas Kiessling

- Subject changed from Option to disable automatic creation of redirects on slug change to Option required to disable automatic creation of redirects on slug change

##### #4 - 2020-08-06 07:46 - Andreas Fernandez

- Status changed from New to Needs Feedback

You can disable this feature in your site configuration, please see

<https://docs.typo3.org/c/typo3/cms-core/master/en-us/Changelog/10.1/Feature-89115-Auto-createRedirectsOnSlugChanges.html>.

Does this help you?

##### #5 - 2020-08-06 09:02 - Andreas Kiessling

- Subject changed from Option required to disable automatic creation of redirects on slug change to Documentation missing to disable automatic creation of redirects on slug change

- Description updated

Hi Andreas,

that looks good, thanks for the pointer!

I've updated the ticket, because this needs to be officially documented and not put just in the changelog.

#### #6 - 2020-08-06 09:02 - Andreas Kiessling

- Description updated

#### #7 - 2021-01-23 11:07 - Riccardo De Contardi

I tried to test the feature as stated on the documentation link:

<https://docs.typo3.org/c/typo3/cms-core/master/en-us/Changelog/10.1/Feature-89115-Auto-createRedirectsOnSlugChanges.html> by putting the code on my config.yaml file

on version 10.4.12 (fresh installation with composer)

And I found that

- using the suggested code works (e.g.)

```
settings:
  redirects:
    autoUpdateSlugs: false
    autoCreateRedirects: false
```

actually disables the automatic recreation of the redirect;

also a test like:

```
settings:
  redirects:
    autoUpdateSlugs: true
    autoCreateRedirects: true
    httpStatusCode: 303
```

works, too: the redirect is created automatically and listed as a 303 on the Redirects module.

Instead **it does not work** if I put the redirects node directly on the root of the config.yaml file as suggested by Jörn Wagner.

The only thing I found it wrong on the documentation is the indentation of the snippet of code; I had to adjust it on the config.yaml file.

Is it sufficient to consider this issue closed?

@Jörn Wagner may I ask you to test it again?

#### #8 - 2021-01-29 13:23 - Jörn Wagner

Sorry, it seems to have been a caching problem while trying multiple things to deactivate autoCreateRedirects.

Imo this ticket should not be closed but documented as Andreas stated.

#### #9 - 2021-03-19 09:15 - Daniel Goerz

- Related to Task #89301: Streamline automatic slug & redirects handling added

#### #10 - 2021-03-19 09:47 - Sybille Peters

- Related to Task #88570: Documentation is missing for new system extension "redirects" added

#### #11 - 2021-04-13 08:12 - Sybille Peters

- Category set to Documentation

#### #12 - 2021-11-03 21:40 - Sybille Peters

- Status changed from Needs Feedback to Closed

Documentation was published today: <https://docs.typo3.org/c/typo3/cms-redirects/master/en-us/Setup/Index.html#site-configuration>

A PR was added to add redirects documentation to system extension page <https://docs.typo3.org/Home/SystemExtensions.html>

Should also be changed in the next few days.

Please check if this contains the information that was missing - I think it should. Closing.
