<b>Description</b>	
Migrate the following hooks to an event: <ul style="list-style-type: none"><li>• <code>\$GLOBALS['TYPO3_CONF_VARS']['SC_OPTIONS']['recordlist/Modules/Recordlist/index.php']['drawHeaderHook']</code></li><li>• <code>\$GLOBALS['TYPO3_CONF_VARS']['SC_OPTIONS']['recordlist/Modules/Recordlist/index.php']['drawFooterHook']</code></li></ul> Replace the hook usage in <code>sys_note</code> with an event listener.

[TASK] Migrate RecordListController hooks to an PSR-14 event

The following hooks in the RecordListController are used to add additional content above or below the main controller content:

- `$GLOBALS['TYPO3_CONF_VARS']['SC_OPTIONS']['recordlist/Modules/Recordlist/index.php']['drawHeaderHook']`
- `$GLOBALS['TYPO3_CONF_VARS']['SC_OPTIONS']['recordlist/Modules/Recordlist/index.php']['drawFooterHook']`

As this functionality could be useful, it should be migrated to a PSR-14 event. Both hook implementations use a meaningful parameter set (the request object) and return the additional content as string. As there is no dependency to the parent object (the class instance of the class where the hooks are placed), they could be migrated to a psr-14 event without a breaking change.

Therefore, a PSR-14 event has been implemented to replace the hook functionality. An event listener has been created to provide a compatibility layer for both hooks. This allows a proper deprecation without breaking the hooks.

The event listener (compatibility layer) could be removed in later versions without any changes in the controller class.

[!!!][TASK] Remove RecordListController hooks

The RecordListController hooks were migrated to PSR-14 events and are therefore now removed.
