

TYPO3 Core - Bug #92100

Yaml File Loader doesn't keep imported items in the order in which they are imported

Description

In a multi-site multi-language installation the sites configuration is built from various imported files. If you import languages in a certain order they appear in the reversed order in the resulting configuration. This means that the wrong language is seen as the default language.

```
imports:
- { resource: 'English.yaml' }
- { resource: 'German.yaml' }
```

and English.yaml contains stuff like

```
languages:
-
  title: English
  enabled: true
  languageId: 0
  base: '/'
  typo3Language: default
  locale: en_US.UTF-8
  iso-639-1: en
  navigationTitle: English
  hreflang: en-US
  direction: ''
  fallbackType: strict
  flag: gb
```

Then the German configuration comes first, which makes that the default configuration.
