

TYPO3 Core - Bug #92381

Button "Create new" does not re-appear for inline (IRRE) elements after reaching maxitems and removing one element

2020-09-23 10:40 - Christian Buelter

| Description | | | |
| <p>When a "maxitems" TCA configuration is set for inline elements, the "Create new" button disappears after reaching the maxitems limit, but the button does not re-appear if one element is deleted.</p> <p>The button will re-appear after saving the record.</p> <p>If there's also a value configured for "minitems" and "minitems" = "maxitems", it's not possible to save the record. Therefore it is not possible to remove the inline element at all, meaning it is not possible to remove one and add another element.</p> | | | |
| Expected behaviour | | | |
| <p>After reaching the limit of inline elements configured in "maxitems" and removing one element, the "Create new" button should re-appear.</p> <p>Tested in TYPO3 10.4.6 and news 8.4.0</p> | | | |
| Steps to reproduce (using EXT:news as an example) | | | |
| <ol style="list-style-type: none">1. Install EXT:news2. Set the following PageTS<pre>TCEFORM.tx_news_domain_model_news.related_links.config.minitems = 1 TCEFORM.tx_news_domain_model_news.related_links.config.maxitems = 1</pre>3. Add a news element. Add a "related link" element inside the news element using the "Create new" button. The "Create new" button disappears. Remove the "related link" element. The "Create new" button still is gone. | | | |

- Status changed from New to Needs Feedback

Hi, I'm not able to reproduce the behaviour. This should already be fixed in latest v10 (10.5.9) with this patch: <https://forge.typo3.org/issues/91808>.

Could you please check if you can still reproduce it with this patch applied.
