Description

The search and password reset input have no associated label which can be determined programmatically.

```
<input type="text" class="form-control toolbar-item-search-field t3js-topbar-navigation-search-field" placeholder="Search" id="live-search-box" autocomplete="off">
```

```
<input type="email" name="email" value="" placeholder="you@example.com" class="form-control input-login t3js-clearable" autofocus="autofocus" required="required">
```

To fix this problem, the best way is to add a label to the inputs:

```
<label for="live-search-box">Search:</label>
<input type="text" class="form-control toolbar-item-search-field t3js-topbar-navigation-search-field" placeholder="Search" id="live-search-box" autocomplete="off">
```
