

## TYPO3 Core - Bug #92629

### Create new content element buttons use the same ID (in fluid based page module)

2020-10-21 12:34 - Oliver Bartsch

#### Description

The ID-attribute value must be unique, the div surrounding the "Create new content element" buttons currently use the same ID in fluid based page module.

```
<div class="t3js-page-new-ce t3-page-ce-wrapper-new-ce" id="colpos-0-page-7-5f72f23fc4eea013131177"></div>
```

[BUGFIX] Ensure getUniqueld returns unique ids for grid objects

The fluid based page module tried to return a "unique id" for each "create content element" button using the `getUniqueld` method. This id however was not unique as it was stored as class property after the first creation.

This lead to all buttons got the same ID which is according to the spec <https://html.spec.whatwg.org/multipage/dom.html#the-id-attribute> not allowed.

Therefore the `getUniqueld()` method now returns a new "unique id" on each call.
