Description

Greetings!

I've noticed that the image cropping does not work properly anymore after the 10.4.11 release. All cropped images get stretched out after saving the cropped image in the backend and clear all previous processed images (see screenshots).

Steps to reproduce:

- Crop an image
- Save the CE
- Close CE
- Reopen CE

--> Image is now stretched out (like in the screenshot)

Steps to reproduce in frontend:

- Clear temp assets
- Clear cache
- Go to Frontend

--> Image is now stretched out (like in the screenshot)

Thanks in advance!

I can't reproduce the Frontend behaviour, only backend behaviour

#7 - 2020-12-17 08:39 - Zenoussi no-lastname-given

I can confirm the behaviour – Frontend and Backend

#8 - 2020-12-17 09:32 - Thomas Maroschik

I can reproduce that too. I already debugged the issue in depth and will soon push a patchset.

#9 - 2020-12-17 09:50 - Gerrit Code Review

- Status changed from New to Under Review

Patch set 1 for branch **master** of project **Packages/TYPO3.CMS** has been pushed to the review server. It is available at <https://review.typo3.org/c/Packages/TYPO3.CMS/+/67173>

Can somebody here please provide exact data to reproduce? An image and the exact sys_file_reference DB crop field json? thanks!

Never mind. Can reproduce this as well.

#13 - 2020-12-18 12:12 - Jörn Wagner

I can confirm the bug and also the fix referenced in [#93090#note-10](#). I have included it already in one live installation via composer patch because editors started to be affected. It would be most welcome if this could be released in 10.4.12 asap.

#14 - 2020-12-18 15:28 - Andrea Moroni

I can confirm the bug. But the fix doesn't work in data-variant="default" and Bootstrap Package Master...here arrives the original size in FE, even if the cropping is shown correct in BE.

#15 - 2020-12-18 17:30 - Zenoussi no-lastname-given

Only the backend works on my live server (GraphicsMagick), as with Andrea Morini (Ciao!), the original image is rendered in the frontend. I don't use Bootstrap-Package. In my development environment (Mamp: ImageMagick), however, the backend and frontend work correctly.
