[TASK] Fetch route from request instead of GET parameter

The "route" GET parameter is deprecated since #93048. Therefore the route path has now to be fetched from the request object instead.

This patch replaces all places in core where the route is still fetched via GET. It's currently often necessary to access `$GLOBALS['TYPO3_REQUEST']` therefore, since the request object is not always present at those places. This will be tackled in upcoming patches.

Revision 3026ddc1 - 2021-08-23 14:52 - Oliver Bartsch

[TASK] Fix possible null pointer exception

AbstractTreeView defines the current "scriptUrl", to build links in the backend. Since this class may also be called via CLI, e.g. by EXT:impexp, missing `instanceof` checks are added to prevent a null pointer exception.
