

TYPO3 Core - Bug #93216

Include addRootLineFields in page tree controller

2021-01-04 16:00 - Nicole Cordes

Status: Under Review	Start date: 2021-01-04

Description	
Given: - an own overlay for pages should be added using the \$GLOBALS['TYPO3_CONF_VARS']['SC_OPTIONS']['\TYPO3\CMS\Core\Imaging\IconFactory::class']['overrideIconOverlay'] - coming from \TYPO3\CMS\Backend\Controller\Page\TreeController::fetchDataAction only a hardcoded list of fields is available in a page record row	
Expectation: - page records are fetched with fields from \$GLOBALS['TYPO3_CONF_VARS']['FE']['addRootLineFields']	
Actual: - only static fields are fetched (see \TYPO3\CMS\Backend\Controller\Page\TreeController::getPageTreeRepository)	

History
