[BUGFIX] Use absolute path for media files in backend

Since #93048 using relative paths in backend does not longer work in most cases. Therefore the MediaRenderers should always use absolute paths when in backend context.

Resolves: #93226

##### Revision 235a9881 - 2021-08-30 20:34 - Helmut Hummel

[TASK] Generate absolute FAL URLs in backend

With #93048 and #93048 every backend usage of public FAL urls were touched and passed through PathUtility::getAbsoluteWebPath()

This change introduces a different approach to register an event listener in a backend middleware, which makes all public URLs absolute.

With this, all PathUtility::getAbsoluteWebPath calls for FAL assets became obsolete and are removed again.
