<b>Description</b>			
Some modules use the Bootstrap collapse JavaScript plugin. They are currently not working anymore since TYPO3 uses class in for the expandend state while it's show in bootstrap v5.			
Places which use in:			
<ul style="list-style-type: none"><li>• Recordlist control panel buttons</li><li>• Recycler record information</li><li>• Workspace record relations</li><li>• Upgrade&gt;Upgrade documentation filter</li></ul>

[BUGFIX] Fix several issues with collapse elements

Since bootstrap v5 the collapse JavaScript plugin is using `collapse.show` instead of `collapse.in` as the expanded state class.

Since TYPO3 added custom styles based on the `in` class, several modules did not longer work. This is now fixed by using the correct class.

Additionally the workspace record collapse state identifier icon now reflects the current state again.

Resolves: #93243

Releases: master
