<b>Description</b>			
Since Page Overview and Page Localization uses <td> instead of <th> for the table header, the proper distinction between header and body rows is missing.

[BUGFIX] Fix table header styles in info module

To restore proper distinction between header and body rows, the table header cells now use the th tag instead of td.

This also fixes a bug which lead to all rows got 0 assigned as data-uid in the page overview table. Furthermore are some variables renamed to increase readability.

Resolves: #93356

Releases: master
