<b>Description</b>			
Using f:form.checkbox or f:form.radio <b>without</b> a property-attribute inside a f:form with object="..." attribute leads to the error			
Argument 2 passed to TYPO3\CMS\Extbase\Reflection\ObjectAccess::getPropertyPath() must be of the type string, null given, called in /var/www/html/private/typo3/sysext/fluid/Classes/ViewHelpers/Form/AbstractFormFieldViewHelper.php on line 311			
This is due to ObjectAccess::getPropertyPath expects its second parameter to be a string (strict_types), which has been changed in 10.0 via <a href="#">#87332</a> .

[BUGFIX] Check if property is null

ObjectAccess::getPropertyPath requires its second parameter to be string, so it should not be called if the property argument is null but return null instead as the getPropertyPath method would have done in earlier versions.
