**Description**

**Steps to reproduce:**

1. Go to list module
2. Open the "New record" view
3. Select "Click here for wizard!"
4. Select a content type with the "SaveAndClose" option, e.g. "divider"

**The following error occurs :** Attempt to insert record on page '[root-level]' (0) where this table, tt\_content, is not allowed

**Reason:** The uid\_pid parameter is missing in the URL

[BUGFIX] Prevent saveAndClose in MultiStep wizard

With #90461 a new option "saveAndClose" was added to the newContentElement wizard. When opening the wizard and selecting a content type with such option set, the new element will directly be created - no FormEngine interaction - and placed at the position (colPos, sorting), the user opened the wizard.

This functionality however does not work when the wizard was opened without such page context, for example via the "new record view" in the recordlist. The position must then be defined by the user explicitly in the MultiStep wizard, so no "saveAndClose" functionality is available in such cases.

Resolves: #93876

Releases: master, 10.4
