Description

Testet on <https://demo.typo3.org> (10.4.14):

- Upload a svg File
- Create a text/media CE
- Choose the svg as media
- Crop the image
- Save the content -> Quits with an Error
- Editing is not possible fourthermore exsept deleting this CE in Listview

I guess maybe it would better to create a set of possible image formats for the cropping tool?

History

#1 - 2021-04-23 10:00 - Martin Kutschker

Technically it could be cropped by modifying the SVG element's attributes.
