Description			
<p>We would like to have the possibility to switch off/hide different buttons in the workspaces module, as they are not helpful for our project. Currently we are forced to overwrite the JavaScript code for this - as workaround for following issue: [https://forge.typo3.org/issues/94404]].</p> <p>I could imagine that you would want to remove some of the buttons for your custom interface design requirements.</p> <p>We have switched off the following buttons:</p> <p>"remove" button rendered by "Backend.renderWorkspaceInfos"</p> <p>"prevstage" and "nextstage" buttons rendered by "Backend.viewChanges" for modal</p>
