

TYPO3.Fluid - Bug #9454

If condition in viewhelper attribute

2010-08-25 14:18 - Daniel Lienert

Status:	Rejected	Start date:	2010-08-25
Priority:	Won't have this time	Due date:	
Assignee:	Adrian Förder	% Done:	0%
Category:	ViewHelpers	Estimated time:	0.00 hour
Target version:			
Has patch:	No		
Description			
It should be possible to set an attribute in a viewhelper by an if condition.			
For example i want to set the attribute onchange conditional by an object property: <f:form.checkBox name="name" value="value" additionalAttributes="{f:if (condition: '{object.submitOnChange}', then: '{onchange : \submit()\}')}" />			
Fluid throws the exception: #1237900529: The argument "additionalAttributes" was registered with type "array", but is of type "string".

History

#2 - 2012-11-14 08:51 - Adrian Förder

- Category changed from Core to ViewHelpers
- Status changed from New to Rejected
- Assignee set to Adrian Förder
- Priority changed from Should have to Won't have this time
- Has patch set to No

compare to [#42474](#); since you want to omit the attribute at all, you have no other choice than to make the whole tag conditional.
