[BUGFIX] Streamline mount page resolving for HMENU special=list

TYPO3 used RelationHandler for HMENU special=list to fetch all pages for this menu once, but fetched the full records again for MountPoint relation, and manual language + workspace overlay was taken care later-on.

Once menus were generated with mountpoints and workspace and language overlays, the ordering was not in line, and existing queries were not used.

Instead, the code is now simplified and fully relies on PageRepository functionality, just as most other Frontend-related code.

Resolves: #94643

Releases: master

Change-Id: Ib86116a74c7db6739c474e5efb13b77284e41b08
