Description

Hello,

i have multiple pages of redirects in my system.

i tried to insert a specific page number in the pagination. after press ENTER the complete backend will be loaded nested in the module frame

the request in this case is e.g. www.example.com/typo3/index.php?paginator-target-page=12

looks like the route & action parameters are missing.

when i use the pagination arrows to switch between the pages the url looks like
`/typo3/index.php?route=/module/site/redirects&token=111&action=overview&page=2`

Revision cb69dfb9 - 2021-10-13 14:29 - Martin Tepper

[BUGFIX] Fix page link in redirects module pagination

With this patch, the page link (requesting a dedicated paginated page) in the redirects module pagination is now working again. This is done by accessing the target from the corresponding event, since it's not forwarded as method argument.

Resolves: #94661
Releases: master, 10.4
