[FEATURE] Add filter to columns selector in recordlist

To ease the use of the new columns selector, especially when dealing with tables, having a large number of columns (e.g. pages or tt_content), a filter is added to the columns selector action bar.

The remaining actions, such as "check all" are then bound to the current filter result. This allows to quickly select a specific group of columns.

Resolves: #94680

Releases: master
