#### Description

After update to TYPO3 10.4.19 I discovered that email addresses where not properly rendered. The href attribute is missing.

The problem occurs with the following TypoScript settings:

- config.spamProtectEmailAddresses != 0
- lib.parseFunc.htmlSanitize = 1
- lib.parseFunc\_RTE.htmlSanitize = 1

When disabling spamProtectEmailAddresses or htmlSanitize the function works as expected.

The problem seems not to occur in fluid view helpers.
