Description

A new SanitizerInitiator is added and forwarded to typo3/html-sanitizer. This allows to get a full stack-trace when HTML nodes have been sanitized/modified and allows to debug the actual cause (initiator) much better.

How to test?

- composer req typo3/html-sanitizer:dev-main
 - (or manually clone into vendor/typo3/html-sanitizer directory from <https://github.com/TYPO3/html-sanitizer>)
- apply patch from <https://review.typo3.org/c/Packages/TYPO3.CMS/+70484> (TYPO3 v10.4 currently)
- have logging enabled as described in <https://docs.typo3.org/c/typo3/cms-core/master/en-us/Changelog/9.5.x/Important-94484-IntroduceHTMLSanitizer.html#debugging-logging>
- have debugging enabled via TypoScript, like config.debug = 1

In case tags/attrs are modified, this will be shown in the log file, next to new initiator stack-trace.

[TASK] Forward initiator to typo3/html-sanitizer

A new `SanitizerInitiator` is added and forwarded to `typo3/html-sanitizer`. This allows getting a full stack-trace when HTML nodes have been sanitized/modified and to debug the actual cause (initiator) much better.

To receive corresponding initiator stack-traces

- logging for TYPO3.HtmlSanitizer namespace needs to be enabled
- TypoScript `config.debug = 1` must be set, or as a fall-back`\$GLOBALS['TYPO3_CONF_VARS']['FE']['debug'] = true;` must be set
- HTML sanitizer must have found and modified invalid tags/attributes

Resolves: #94837

Releases: master, 11.3, 10.4, 9.5
