Description			
If mail addresses are encrypted with config.spamProtectEmailAddresses, only an A-tag is output without any href, both in TYPO3 10.4.19 and 9.5.29, possibly also in v7 and v8. Although lib.parseFunc.htmlSanitize = 0 lib.parseFunc_RTE.htmlSanitize = 0 solves the problem, it thwarts imo the security update			

History

#1 - 2021-08-12 15:12 - Bastian Bringenberg

- Project changed from *forge.typo3.org* to *TYPO3 Core*

- *TYPO3 Version* set to *10*

Moved Project; Set TYPO3 Version.

#2 - 2021-08-12 16:19 - Pavitro Papadopoulos

Can be closed, as duplicate to 94776.

Patch solves the problem.

#3 - 2021-08-12 16:30 - Oliver Hader

- Parent task set to #94776

#4 - 2021-08-12 16:31 - Oliver Hader

- Status changed from *New* to *Closed*
