<b>Description</b>			
Hello,			
I have just installed a fresh version of TYPO3 11.3 with no additional extensions. After adding a new key to object list in TypoScript Object Browser it is not possible anymore to show full TypoScript of selected page (see video).			
After a reset of User Settings I can see the list again.

[BUGFIX] Properly handle array key access in ExtendedTemplateService

This fixes the ExtendedTemplateService->ext\_getSetup() method, which now properly handles array key accesses.

A new early return now also checks for an empty key and returns the whole setup in this case.  
This is a special case, needed for e.g. the object browser, to still show the full setup when object lists exist.

Resolves: #94971  
Releases: master
