

TYPO3 Core - Bug #95053

findByUid not respecting default query settings of repository

Description

In my repository I use:

```
public function initializeObject()
{
    $querySettings = new Typo3QuerySettings();
    $querySettings->setRespectStoragePage(false);
    $querySettings->setRespectSysLanguage(false);
    $querySettings->setIgnoreEnableFields(true);
    $this->setDefaultQuerySettings($querySettings);
}
```

Although `setIgnoreEnableFields` was set to true in the default query settings I am not able to find hidden elements with `findByUid` in my controller.

As a workaround, I've overridden `findByUid` in the repository as follows:

```
public function findByUid($uid)
{
    $query = $this->createQuery();
    return $query->matching($query->equals('uid', $uid))->execute()->getFirst();
}
```

This seems to be related to:

<https://forge.typo3.org/projects/typo3cms-core/repository/1749/revisions/84c4ff2f2ec1ce98a9b170a6869b57cb4bb32a0c>

I am not sure if this is a bug. Possibly this is just a missing piece in the documentation.
