[TASK] Stabilize acceptance tests

Some acceptance tests fail randomly due to speed/timing of the checked elements or unresolved promises.

This should be avoided now by using "waitForElements" instead of "canSeeElement". This may cause longer test runs but makes sure tests won't fail on performance hiccups.

On top of that Icon.getIcon in DocumentSaveActions will catch unresolved promise in case a new page or reload was triggered by the button to avoid Javascript errors. For example in Scheduler -> Add Task and hit save.

Resolves: #95070  
Releases: master
