[FEATURE] Introduce PSR-14 events for DatabaseRecordList

Three new PSR-14 based events are introduced in favour of the existing `$GLOBALS['TYPO3_CONF_VARS']['SC_OPTIONS']['typo3/class.db_list_extra.inc']['actions']` hook, which is now marked as deprecated, along with its interface "RecordListHookInterface".

Besides the obvious advantage of using PSR-14 events, the RecordListHookInterface also required to always implement all hook methods, even if only one of them was really used.

The new events feature the same functionality, but improved and extended. The main subject, e.g. the record actions or the table header columns, is therefore equipped with extended CRUD methods, like adding a new action at a certain position.
