[FEATURE] Introduce <f:transform.html> view-helper

Introduces `<f:transform.html>` view-helper, providing capabilities to resolves system internal links, like `t3://`.

Example:

```
<f:transform.html selector="a.href,div.data-uri">
  <a href="t3://page?uid=1" class="page">visit</a>
  <div data-uri="t3://page?uid=1" class="page trigger">visit</div>
</f:transform.html>
```

... will be resolved and transformed to the following markup ...

```
<a href="https://typo3.localhost/" class="page">visit</a>
<div data-uri="https://typo3.localhost/" class="page trigger">
  visit</div>
```

Following Composer dependency is made explicit:

```
composer req masterminds/html5:^2.7 ext-dom:*
```

Resolves: #95176

Releases: master
