[BUGFIX] Transform internal URIs in backend user interface

This change allows using internal URIs (like t3://) in components of the backend user interface like

- system news show below the backend login form
- rich text details of system reports

HTML sanitization is applied to mentioned components as well.

[BUGFIX] Avoid using HTML sanitizer in reports module

Reports generated by custom data providers might contain specific HTML markup (including JavaScript, SVG and styles). The changes of issue #95179 introduced XSS-safe HTML sanitization, which however breaks existing functionality for mentioned markups. Thus, HTML sanitization is dropped again in this particular scenario.
